---

# Screwdriver

## Proven shape

World-renowned red transparent ridged handle. Tried and tested over decades of use. Fits comfortably in the hand. No pain even after long use. High resistance to shock. Easy to clean.

## Enduring good looks

Special spring steel alloy blade. Nickel and chrome plated for protection against rust.

## Insulated blade

For electric applications. Tested up to 1000 Volts in accordance with IEC 60900 standard.

## High precision tip

Parallel tip ensures perfect fit with slotted screw. Reduces risk of 'camming' screw head.

# Screwdriver with multicraft® handle

## Hand-friendly shape

Powerful pressure without pain thanks to the rounded smooth handle end.

## Powerful torque

Extra-wide multicraft® handle provides greatest torque possible.

Special roughened surface stops slipping when hands are wet or oily.

## Renowned quality

Tip is famous for its consistent hardness and accurate dimensions. This guarantees renowned PB quality.

# PB Twister®

## Powerful torque

Extra-wide multicraft® handle provides greatest torque possible. Special roughened surface stops slipping when hands are wet or oily.

## Efficient twisting

Built-in clutch enables swift, smooth tightening. Switch from clockwise to anti-clockwise to lock with one hand.

## Size compatible

Magnetic bit-holder for the entire range of bits with 6 mm fitting (C6). Available in various blade lengths.

# Precision screwdriver for electronics

## Work with precision

Effortless use thanks to slim design.

## Fine adjustments

Turnable handle-cap makes fast twisting and fine adjustments easier.

## Slender design

Special long and slender blades available for recessed and difficult positions.

## Non-slip surface

Special PB handle material provides non-slip surface.

## Small but powerful

Tough steel and ultimate precision – essential for a tool of this small size.

# Non-rebounding nylon hammer

## Controlled hammering

Cushioned recoil. On impact, discs built into head are forced downwards. Accurate striking with full force is made easy.

## Easy exchange

Shaft and head are securely fastened but are easy to replace.

## Long work life

Centre piece is made of steel.

# Brad punch

## Long life

Special PB spring steel alloy gives exceptional toughness, great hardness, long life.

## Double-tempered for safety

Absolutely shatter-proof impact head.

## Attractive protective finish

Nickel and chrome plated surface gives good grip and protects against corrosion.

# Slot chisel

## Shock-resistant head

Inductively heat-treated. Absolutely shatter-proof.

## High-quality powder coating

Gives good grip and protects surface.

# Hexagon key with ball-end

## Easy application

Slightly chamfered edges make fitting into hexagon socket screws easy.

## 30° angle

Precision-shaped ball head. Hexagon socket screws can be turned on an angle.

# Highest quality swiss tools for demanding jobs

## **The environment is our concern**

Our environmental management system has international certification (ISO 14001), guaranteeing environmentally friendly production and responsible use of raw materials.

## **Optimum strength**

Our heat treatment gives our tools a high degree of strength.

## **Extremely long life**

Our special steel alloy guarantees a lifetime of service.

## **Unique features**

The special material for handles gives our tools unique qualities: tough, shock-resistant, easy to grip, unaffected by oil and fuel.

## **Automated production**

Highest quality and extremely competitive prices are achieved by automated production.

# the most

## **Supreme quality**

Our Quality Assurance System has international certification (ISO 9001). Consistent quality is guaranteed by in-house production from the raw material to the finished product.

## **Lifetime guarantee**

Continuous quality inspections enable us to give you a lifetime guarantee on all our hand tools.

## **Tracing the manufacturing process**

The five-digit serial number enables us to trace production from the raw material stage.

## **Continuous improvement**

Our own development department ensures state-of-the-art quality and an expanding range of products for our international clientele.

**More and more clients  
all over the world  
are choosing PB tools.**

# PB – the Company.

## **Quality is our watchword**

A growing worldwide customer base uses PB tools. Over the decades, PB Baumann Ltd. has grown from a small workshop into a modern, innovative industrial corporation.

The family firm from the Emmental district has 130 employees and produces several million high-quality tools annually in plants at Wasen and Sumiswald.

We place equal emphasis on environmentally friendly production and a competitive price structure. To serve our clients better, PB is constantly developing new and even better quality tools. Our international presence is being expanded by our employees and clients. In this way we can guarantee jobs and safe tools for many years to come.
