

# Contents

## A Cable glands 11 – 180

### Cable glands for standard applications

- made of plastic
- made of brass
- Accessories

### Cable glands for special usage conditions

- for electromagnetic compatibility (EMC)
- for robust applications and special chemical resistance
- for increased usage temperature
- for potentially explosive atmospheres
- for special installation conditions
- for special pressure conditions
- Accessories

## B Protective tubes 181 – 262

### Corrugated tubes

- for standard applications
- in oversize
- split corrugated tubes
- tube connectors

### High flexible protective tubes

- made of plastic with coil springs
- made of metal, spiral wound
- tube connectors

### cable protection tubes for heavy-duty applications

- metal protection tubes, with plastic jacket
- Plastic protection tube
- tube connectors for metal protection tubes

## C Drag and guidance chains 263 – 286

### Open chains

### Closed chains

### Accessories

### Installation notes

### Selection tables

## D Insulating, shrunk, braided and high temperature tubes 287 – 308

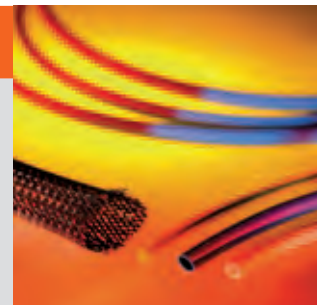

### Braided sleeves

### High temperature protection

### Insulating tubes

### Shrink-on sleeves

### End caps
