

## bigHead Tubtara®

Extra large head  
Standard Tubtara®  
Steel, stainless steel A2 & A4

for composite  
materials

## Tubtara® with extra large head for mechanical joining of composites or strong anchor applications

### ● Design

A disc or oversized washer is welded onto a standard Tubtara blind rivet nut's head. Both the rivet nut and the disc can feature additional characteristics resulting in a wide product versatility. A customized design could incorporate additional shank features (knurl, hex), disc forms (square, cylindrical) or characteristics like a keyed head or underhead cross.

### ● Advantages for composite applications

- customized mechanical fastening solutions
- the oversized head provides a large bearing area
- the bigHead is ensuring a greater load distribution into the substrate, resulting in higher pull-out values
- with a perforated disc design, the Tubtara can lock securely into position, embedded or not
- installed quickly and tightly, despite burrs or uneven surfaced substrates
- is hole size tolerant
- allows easy inspection possibility
- requires minimal surface preparation and can be disassembled after installation

*The collaboration between bigHead Bonding Fasteners Ltd. and Dejong results from a customer specific application in the marine industry.*

How to order or inquire: Please prefix the TUBTARA order code with 'R852-' example: R852-513550
